

**PENGUMUMAN
PT INDO KORDSA TBK ("Perseroan")
TENTANG PEMULIHAN OPERASIONAL PASCA BANJIR DI PABRIK PERSEROAN**

***ANNOUNCEMENT OF PT INDO KORDSA TBK (the "Company")
REGARDING OPERATIONAL RECOVERY POST-FLOOD AT THE COMPANY'S FACTORY***

Sebagaimana telah kami informasikan sebelumnya, bahwa fasilitas produksi Perseroan terdampak oleh bencana banjir yang terjadi di Bogor, Indonesia, pada tanggal 4 Maret 2025. Seluruh kegiatan pembersihan pascabanjir telah diselesaikan. Berdasarkan hasil penilaian kerusakan, menunjukkan bahwa fasilitas penunjang yang memasok energi ke area produksi terdampak cukup signifikan. Kondisi ini menyebabkan gangguan pada pasokan energi ke pabrik serta keterlambatan dalam proses evaluasi kerusakan secara menyeluruh.

Sebagai bagian dari upaya pemulihan operasional, produksi kain telah mulai berjalan kembali dengan memanfaatkan persediaan benang yang tersedia, seiring dengan pengaktifan kembali fasilitas penunjang energi. Fasilitas produksi benang *Polyester* direncanakan akan beroperasi secara bertahap mulai bulan Mei, sedangkan fasilitas benang *Nylon* ditargetkan menyusul pada bulan Juni. Proses penilaian kerusakan akibat bencana banjir ini masih berlangsung dan sedang dilakukan bersama pihak perusahaan asuransi.

As previously stated, The Company's production facilities have been affected by the flood disaster occurred in Bogor, Indonesia on 4 March 2025. Our cleanup operations after the flooding disaster have been completed. Damage assessment efforts revealed that the auxiliary facilities supplying energy to our production facilities were significantly affected. This has caused disruptions in supplying energy to our factory and delays in the damage assessment efforts.

As part of our efforts to restart the operations, following the activation of the auxiliary facilities supplying energy, our fabric production partially continues with the use of existing yarn supplies. Our Polyester yarn facility is expected to gradually start operations in May and Nylon yarn facility in June. Assessments regarding the damage from the flood disaster are ongoing with the insurance company.
